---

Bob, Jim & Rick

EPA's cover letter and comments on the Remedial Investigation Report and Baseline Risk Assessments are attached. We believe that the report is a significant milestone for the project and, while our comments are extensive and we are requiring revision and resubmittal of the documents, significant portions were well done and we appreciate the LWG's efforts producing the reports and working with us to keep the FS moving forward.

Chip Humphrey  
EPA

ps - considering the time of day, the response clock won't include the weekend, which has hopefully already started for you.....
